VBW® ●

VBW

FULL POWER AHEAD INTO THE FUTURE.

For generations, VBW has stood for uncompromisingly good tools that have inspired users both in terms of handling and appearance. Thanks to exact design and ultra-modern production methods, future-orientated everyday aids have been created for a wide range of industries. This objective is just as valid today as it was when the company was founded in 1828: tool design that thinks ahead. Core competencies – made in Germany.

From now on, we are expressing our passion for tools by applying a new design, which heralds an exciting future that holds numerous fascinating new developments. Get ready for your next set of tools.

This is not a revolution.

It is evolution.

Derived from experience – made for daily application.

VBW

NO ACCIDENT.

Perfect tools don't just happen. They are the result of many years' experience, state-of-the-art production technology and high-grade materials. Since the company was founded, we at VBW have passed on our valuable know-how from generation to generation in order to enhance it further with the many opportunities offered by contemporary toolmaking techniques.

However, we do not have to go down this path alone, because our brand is part of the STAHLWILLE Group. That means you can rely on a passionate team that knows how to pool its skills and achieve optimum results at every step of the process. Perfect tools.

FROM WUPPERTAL WITH LOVE:

**WHEREVER YOU SEE VBW,
YOU KNOW THE PRODUCT
IS ALSO MADE IN GERMANY.**

If you buy a tool, you want to be able to rely on it for every use and over many years. This is our claim, as we have always manufactured excellent products which thrill users around the world and stand the test of time. Quality promises are everywhere these days – but our seal has represented extraordinary value and the greatest production precision around the world for generations.

Used all too often, we take the underlying guidelines very seriously and promise that we produce our products exclusively in Germany. We set out these guidelines with pride and respect – the tool in your hand will be a testament to that.

COMPETENCE IS KEY

**Steel wire mesh cutters. Bolt cutters.
Water pump pliers. Pipe pliers.
4 products, 4 key competences.**

If you want to show concentrated competence, you have to think about the future. Our hand-picked highlights in this brochure will be your fundamental guide to strong product ranges. In the high VBW quality that you're used to, with durable materials and ergonomic optimisation. This is because they are a symbol for the forward-thinking work that we do each day: here, we don't just promise great things, we achieve them on an ongoing basis.

MAKE IT EASY.

Build something big. Shape the future. Construction sites are focal points of creativity and manual labour of a professional standard, which makes them a point of contact for those who don't just talk about work, but actually put their skills to good use. Hard work needn't be hard – if you have the right tools. Easy to handle and yet impressively powerful – that is the result of almost 200 years of experience. Discover our legendary bolt and wire-mesh cutters now and become part of the success story that has inspired generations.

CONSTRUCTION
INDUSTRY

Our unique LightCut® technology.

If you notice the tool weighs only half as much, what is it like to work with? Powerful and unstoppable, these cutters for bolts & welded wire-mesh slice through hard materials and are incredibly light to handle. Weighing in at just 2650 grams, our LightCUT® bolt cutters are an unbeatable lightweight, for instance. Thanks to high-strength aluminium tubing and ergonomically optimised handles, you will experience the original VBW quality in its lightest form. Your back will appreciate your decision to buy!

435LC LightCUT® cutters for welded wire-mesh

Provides easy grip on construction steel parts lying flat

MAIN PRODUCT LightCUT® cutters for welded wire-mesh, red, aluminium tubing

ABSOLUTE PRECISION

Binding, drilling and separating in a single work process: 100% precise!

Steel fixer's pincers or tower pincers are used mainly on rebars on construction sites for twisting binding wire and cutting it cleanly and easily. Accurate working is guaranteed by the small, narrow head of VBW TopCUT steel fixer's pincers and VBW MasterCUT heavy-duty steel fixer's pincers. This means our pincers can be used on even very fine jobs, e.g. extracting nails, clamps and similar objects.

510 TopCUT steel fixer's pincers

Suitable for binding, twisting and cutting

MATERIAL Black lacquered, polished head

IN THE PIPELINE!

In sanitary, heating and ventilation construction, you need a simultaneous combination of strength and sensitivity. Strength is needed to move threaded connections but, at the same time, you have to be gentle on the material, especially with such components as U-bends. In order to be perfectly prepared for any task, we have put all our experience into developing high-quality wrenches that give you the features you expect from a professional tool. From our classic slip-joint pliers and pipe-wrenches through to custom-made products, you will find everything here to meet the professional's needs.

115 X-GRIP ABC plumber's wrenches

Provide a firm grip on pipes, flats and screw fittings due to special jaw shape

More about
special solutions:

SPECIAL SOLUTIONS

YOUR COMPANY. YOUR TOOLS.

Could you design and manufacture your own tools from scratch? Hardly. Why not take advantage of our concentrated expertise and have your personal tool (set) custom-made according to the state of the art.

Make **OUR** tool **YOUR** tool – with your own choice of colour and your company logo at the forefront! Many well-known companies get off to a flying start with private brand tools from VBW, enabling them to offer their customers first-class products and increase customer loyalty through a comprehensive overall range. Feel free to get in touch! Together we can find a solution to suit your company

Not planning a large-scale campaign? That's no problem – we can produce even small quantities at attractive prices – and the quality is always impressive.

How can we help you?

WILL BE MADE
INDIVIDUALLY TO YOUR
SPECIFICATIONS
